UL-125 Wild Fire

The Wild Fire captured the hearts of hydro fans across the country in 1998 by not one, not two, but *three* separate flips after which the driver returned the boat safely to the pits each time. Our model accurately captures the spirit of the Wild Fire design in a 24½" long model of that famous boat, with some advanced technical changes to make this the most stable professional race boat available!

Available in ABS or fiberglass, this kit will provide hours of high-speed thrills and excitement for anybody from the newest sport driver to the National Champions who race them professionally!

- 8-12 cell electric power, or .12-.16 nitro power
- Legal for NAMBA 1:16th and 1:12th Sport Scale Hydro electric classes
- Permits use of hardware kits from several high-performance vendors:
 - Hobby Lobby Graupner GR1157 (recommended)
 - Blew By You Boatworks
 - Fuller's Fast Electrics
 - Octura Model Marine
 - Hughey Boats
- Super-stable aerodynamic design keeps your boat running full speed in gusty winds
- Advanced proprietary hydrodynamics keep your boat on the water when it's rough
- Available in either vacuum-molded ABS or hand-laid fiberglass
- Several affordable versions available, all pre-joined and reinforced at the factory, starting at only \$90.00!
- Optional pre-cut vinyl decals for 1998 UL-125 Wild Fire, cut by the same folks who did the real boat, are available to dress your model as close as possible to the real thing.
- Optional pre-cut vinyl decals for the 1998 and 1999 UL-72 Pocket Mechanic also available, using the same fonts as the real boat. (The real Pocket Mechanic was made from the same mold as the Wild Fire)
- Optional pre-cut and printed vinyl and decals for the 1999 UL-10 Earl's Performance Products, the new sponsor of the original Wild Fire hull.
- All vinyl sets come with accompanying pictures of the real boat to aid in placement.
- Instruction assembly manuals are available from our site on the Internet in order to provide you with the latest, most up-to-date hints and tips for the best assembly of your model – *an RC-Hydros.com exclusive!*
